

H32P55

After 20 years, the H32P55 remains one of the best selling models in the entire Handler lineup. A larger 70 US gallon tank allows for handling higher volumes of dry flowables and powders which can be easily mixed into solution with the integrated pump and closed loop recirculation. Full functionality includes: Handler tank filling and agitation, closed loop recirculation, dual inlet venturi draw from your choice of Handler tank or bulk containers, 10L & 20L container emptying and rinsing, tank rinsing, a wash line, and of course water transfer to the sprayer tank.

All the functionality with a larger tank, combined with cost effective 2" plumbing and pump, make the H32P55 a steady favourite on the farm.
